**Accept private or employer-provided insurance:** No. The patient or responsible party must arrange any pre-authorization required for the service, pay doctor in full at the time of service (credit cards accepted), and file claims for reimbursement after the service is provided.

**Assist with private or employer-provided insurance:** Yes. Most plans cover 50% or more after claims are filed, but the patient or responsible party must arrange any pre-authorization required for the service, pay doctor in full at the time of service (credit cards accepted), and file claims for reimbursement after the service is provided. My offices assist by providing diagnosis and billing codes for use by the patient or responsible party in filing claims after the office visit service is provided.

**Accept Medicaid or Denali KidCare:** Yes. (Claims filed by my office and paid by state agency; patient responsible only for non-covered services described in brochure).

**Accept Medicare:** No – I have opted out of the program. This means Medicare cannot pay for any services rendered by Alaska Psychiatric Concepts. Unfortunately this impacts patients covered by both Medicare and Medicaid, as Medicaid will not cover services for patients if they are eligible for Medicare but are working with a physician who has opted out of the Medicare program.
